

# Blinkit Grocery Data Analysis

Sales & Outlet Performance Dashboard

# Dashboard Preview

Interactive Power BI dashboard showcasing Blinkit's sales performance across outlets, items, and customer segments.

# Project at a Glance

## 8,523 Transactions

Comprehensive grocery sales data analyzed

## Interactive Dashboard

Power BI visualization for strategic insights

## Actionable Insights

Drive outlet expansion and product optimization

# The Business Challenge

Blinkit lacked consolidated visibility into how outlet characteristics and product attributes impact sales performance.

## Critical Questions

- Which outlet types generate highest sales?
- How do location tiers affect performance?
- Which products deserve priority focus?

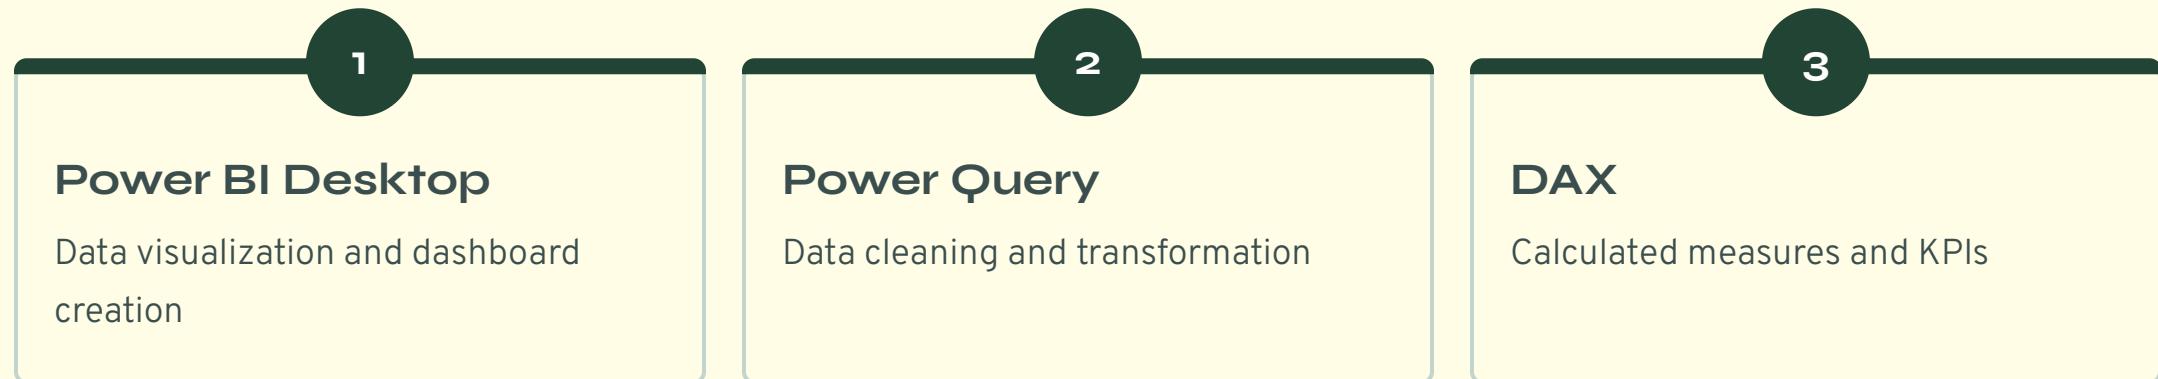

3

## Key Dimensions

Outlet size, location tier, establishment type

# Tech Stack & Data Foundation

**Data Source:** BlinkIT Grocery Dataset (Excel) with item characteristics, outlet attributes, and performance metrics

# Dashboard Goals

## Comprehensive View

Sales performance by outlet and item type

## Trend Analysis

Patterns across size, year, and attributes

## Data-Driven Decisions

Enable expansion and optimization strategies

# Key Performance Indicators

**\$1.2M**

**\$141**

**8,523**

## Total Sales

Revenue across all outlets

## Average Sales

Per transaction value

## Items Sold

Total transactions analyzed

**4.0**

## Avg Rating

Customer satisfaction score

# Top Performance Insights

## Medium Outlets Win

**\$507.9K revenue** from medium-sized outlets

## Tier 3 Dominates

**\$472K sales** in suburban locations

## Regular Fat Preferred

Consistently outperforms low-fat variants

# Dashboard Features

## Visual Analytics

- Sales by item type and category
- Fat content performance comparison
- Outlet size revenue distribution
- Location tier analysis
- Establishment year trends

## Interactive Elements

Dynamic slicers enable exploration by:

- Outlet type
- Item category
- Location tier

# Business Impact

## Enhanced Visibility

Clear view of outlet performance and customer behavior patterns

## Strategic Guidance

Data-driven decisions for outlet expansion and optimization

## Inventory Planning

Improved marketing focus using actionable insights

# Key Takeaways

01

## Data Transformation

Power Query cleaning and preparation

02

## KPI Development

DAX-based measures in Power BI

03

## Business Storytelling

Dashboard design for actionable insights

Transforming 8,523 transactions into strategic business intelligence
